📄 SUMMARY

- Computer Science Engineering undergraduate passionate about software development and technology.
- Strong foundation in programming concepts and problem-solving.
- Eager to learn, build impactful solutions, and gain hands-on industry experience through internships and projects.

🧠 SKILLS

TECHNICAL SKILLS

- **Languages:** JavaScript, HTML, CSS
- **Frontend:** React.js, Responsive Web Design, UI Development
- **Backend:** Node.js, Express.js, REST APIs
- **Tools & Platforms:** Git, GitHub, API Integration
- **Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Web Development
- **Emerging Technologies:** AI Fundamentals, Web3 Fundamentals, DeFi Concepts
- **Soft Skills:** Problem Solving, Team Collaboration, Analytical Thinking

📜 CERTIFICATES

Xenothon

- Participated in Xenothon, a 24-hour hackathon organized by GTBIT.
- Collaborated with a team to build and present an innovative project solution.
- Strengthened skills in problem-solving, rapid development, and teamwork.

Hackxtract

- Participated in Hackxtract organized by MAIT.
- Ranked among the Top 10 teams.
- Collaborated on project development, presentation, and problem-solving in a team environment.

🎓 EDUCATION

B.Tech in Computer Science and Engineering (Data Science)

Bhagwan Parshuram Institute Of Technology

08/2024 – 05/2028 | New Delhi, India

- Maintained strong academic performance with an SGPA of 9.05 in the 3rd semester.
- Built a solid foundation in programming, data structures, algorithms, and software development concepts.
- Actively participated in technical and extracurricular activities to enhance problem-solving and teamwork skills.

📁 PROJECTS

Trustgraph

Hackathon Project | Credit Scoring for Freelancers

- Developed TrustGraph, a hackathon project using React.js, Node.js, Express.js, and JavaScript.
- Integrated GitHub APIs to fetch and analyze user contribution data for trust score generation.
- Designed backend services for data processing, scoring logic, and API communication.
- Utilized REST APIs and asynchronous data handling to process real-time user information.
- Explored AI-assisted scoring mechanisms and Web3/DeFi concepts for decentralized financial identity.

EcoAudit

Hackathon Project | AI-Assisted ESG Risk Analysis and Scoring

- Developed an ESG scoring prototype using JavaScript, React.js, Node.js, and REST API integrations.
- Built data pipelines to aggregate and process company-related information from news sources and public datasets.
- Implemented ESG score classification logic to categorize organizations into Low, Medium, and High-risk segments.
- Designed data-fetching and analysis workflows for sustainability, governance, and compliance-related indicators.
- Explored AI-driven validation techniques using timeline analysis, news frequency patterns, and anomaly detection concepts.
- Collaborated in a team environment using Git/GitHub for version control and project development.

Peace.within.chaos(ongoing)

Creative Wellness Platform | Art-Based Emotional Expression

- Developed a Pinterest-inspired platform for sharing artwork, creative journals, and emotional expression.
- Designed an emotion-based interaction system using emoji reactions to encourage positive and non-toxic community engagement.
- Built an interactive "Chaos Canvas" featuring multiple brush styles, color palettes, drawing tools, and save/delete functionality.
- Enabled users to express emotions through digital art, journaling, and visual storytelling within a collaborative platform.
